

Automatic Ultra High Speed JetDrier™

Model: ASH-MJ4

18 months on Sensor, PCB, Heating Coil & 3 years on motor

Consumes only 700 W

BLDC Motor gives 3X more air speed than carbon brush motors

Heavy Duty Design for all types of facilities

BLDC Motor last 5X longer than carbon brush motor

High Quality Eliminates Breakdowns & Maintenance Costs

Industry Best Safety Features

95% Cost Reduction Compared to Paper Towels

Specifications:

Features:

✓ Material: Anti-Microbial and Fire-Retardant ABS

✓ Power: Smartly uses heat energy from the motor. Optionally if heater is switched ON, the heater only turns ON if ambient temp falls below 20°C.

Power Consumption Matrix

Heater Motor	ON	OFF
	1800W only if ambient falls below 20°C	900W Ideal Operation
High Speed		
Low Speed	1600W only if ambient falls below 20°C	700W

Dimensions:

✓ Dries hands under 15 seconds using thin sheets of 90 m/s high velocity air.

✓ High Speed Brushless DC (BLDC) motor with 31000 RPM provides high air speed with low levels of noise compared to brushed motors.

✓ Equipped with a water tray to avoid water dripping on floor. Water tray has overflow LED which blinks when tank is full

✓ Motor speed & heater coil adjustable by switch

✓ Noise level: 75 db@ 1mtr

✓ Equipped with HEPA filter to remove 99% dust and micro-organisms from intake air

Safety Features:

✓ 30 seconds auto cut-off timer with LED indicator

✓ Heating coil and motor equipped with thermal cut-off and thermal fuse for over heating protection
